

CORPORATE
PRESENTATION

NATIONAL ASSOCIATION OF CONSTRUCTION-ENGINEERING CONSULTANTS (NACEC)

NACEC

MISSION, VALUES, GOALS

GOALS

- To harmonize the legal framework of the concept “Engineering consultant” with international standards and norms
- To facilitate the creation of companies specializing in engineering consulting services in Russia
- To enhance the engineering companies market capitalization by adoption of consulting services as a new activity for such companies and by implementation of the optimal contract strategy
- To ensure the implementation of measures aimed at improving the status and role of the engineering consultant profession

OBJECTIVES

- Monitoring, preparation of proposals and introduction of changes in the regulatory and methodological framework in the field of engineering consulting
- Creation of a national registry of consulting engineers
- Training qualified personnel for the Russian engineering
- Providing consulting services in the field of contract strategy
- Translation and adaptation of the contracts forms and project management tools in the field of engineering consulting

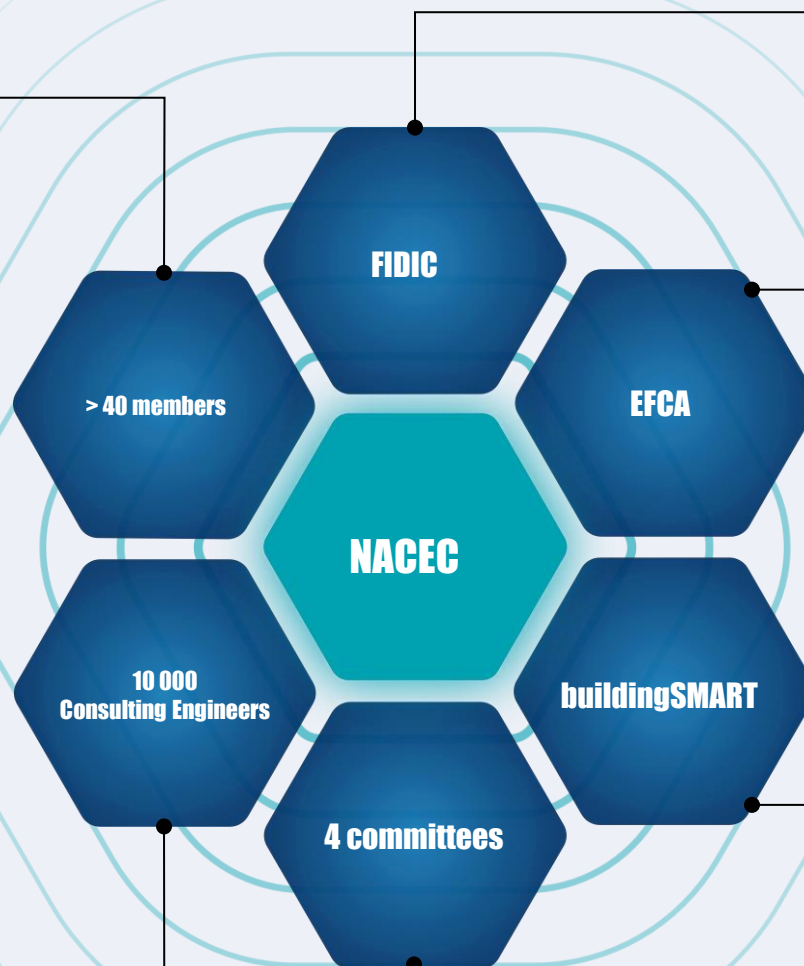

6 NACEC Pillars

- Engineering companies
- Operating companies
- Design Institutes

MEMBERSHIP BENEFITS

**Customized
analytics**

**Participation in international
workshops and trainings**

Networking

**Marketing
(advertising, discounts)**

**Program of International
Certification**

**Committee creation
on base of NACEC following
the member goals**

**Contribution to the Russian
and International standards
elaboration**

**Delivering of individual
partnership programs**

**Council
Membership**

- Additional benefits for strategic partners

ADVANTAGES OF NACEC MEMBERSHIP

PRESTIGE

There are only two associations in the world that develop ISO standards – becoming NACEC member means that you becoming buildingSMART member, that is global association - the founder of openBIM concept

EXPERTISE

In case you client does not have clear requirements for project implementation OR the client cannot manage subcontractors – We will help you to find the consulting engineer and will form the contract strategy based on best FIDIC practice

RECOGNITION STATUS

All international NACEC partners have international competition and working groups programs – We will help you to form application and will lead you to the victory; we will also assist you in becoming the working group member

INFLUENCE

NACEC forms national level standards and appears to be an active member of international platforms for standards discussion – **being NACEC member means that you could influence the content of national standards**

NETWORK

NACEC holds its committees meetings where you can find business partner you need

BUSINESS LEGO

All the options mentioned above give you the opportunity to «form» the project you are interested in and implement it in your company or in your client company with a strong international support

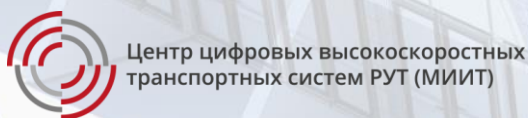

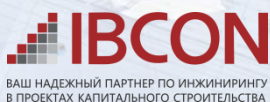

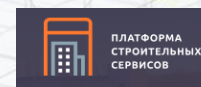

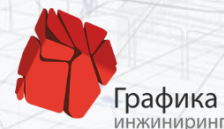

PR

Your logo and info will be placed on NACEC web site; we will advertise your company on any event where NACEC takes part
